

22XX Cooled LWIR Module

Applications

Can be integrated to various type of optronic systems

Functional characteristics

- 1.Compact structure, small size and light weight
- 2.Manual NUC
- 3.Auto/manual brightness/contrast adjustment
- 4.Electronic zooming
- 5.Black hot/white hot display
- 6.Cross hair reticle display/displacement/storage
- 7.Standard composite video signal (PAL)
- 8.Highly environment adaptability and reliability
